World Soccer Academy Our Philosophy

World Soccer Academy will provide a first-class soccer development program intended for players who wish to significantly advance their soccer skills and knowledge of the game.

We will strive to provide the best learning environment, while encouraging cooperation and good sportsmanship.

The low player to coach ratio offered by the academy (maximum of 15 players/coach) will enable players to receive regular and accurate feedback on how to improve their play. .

World Soccer Academy provides specialized and expert training in three general areas:

1. Soccer Training
2. Fitness Training
3. Mental Conditioning

Soccer Training – Includes both technical and tactical elements essential to the game. Dribbling in tight spaces, ball and body control, changing directions, ball feeling, positive ball movement, agility with ball, quickness with feet, feinting, beating opponents, turning techniques, tackling, shielding, receiving, ground/air balls, winning 1vs1 situations, shooting and finishing as well as small group play. The soccer program is designed to help players perform, and execute high level techniques, while demonstrating a keen insight into the game’s nuances.

Fitness Training – Coordination/agility, footwork/mobility, speed training, flexibility, strength and power, nutrition warm up/cool down and injury prevention.

Mental Conditioning Program – Geared towards continuous psychological improvement. Personal awareness, self-confidence, motivation, discipline, goal setting and team building are used as tools to increase effectiveness in pressure situations and daily play.
